

Junior Consultant Front end Technologies

Company description

As a Java and .NET specialist, Nexios IT has taken a strong course since 2006. Thanks to our qualitatively innovative approach, we have proven ourselves several times as an established value in the consulting landscape. Often our engineers are active in an R&D context at top companies in various sectors, such as the financial sector, healthcare, logistics, telecom, industry, ... and we are at the heart of the development of new software.

In order to further support our steady growth, we are always looking for Junior Front end Consultants with a passion for IT.

Job description

Your role will be to join, support or lead our existing project teams and assist them in transforming the project into a technical success by producing the required end result for the client.

Based on your Career Development Path, your wishes, your interests and your level of expertise, you can take part in challenging front end related projects.

Your Profile

- You are graduated as a Bachelor of Master in IT or an associated field.
- You have a passion for developing in Front end programming languages like JavaScript, TypeScript, HTML, CSS and you're hungry of digging more into React, Angular or Vue.JS frameworks and related tools like front end libraries (jQuery, VUE, React native or other)?
- You like variety and would like to gain experience in several projects within leading, innovative companies.
- As a face of Nexios IT at the customer, you help to strengthen the relationship with the customer.
- You are passionate about technology and follow the latest trends.
- Clean coding and other best practices of professional software craftsmanship is part of your daily job routine and you look for pairs and mentors who think the same and who share their experience with you.
- You see yourself as a future architect or expert developer.
- You speak Dutch and/or French and you can express yourself fluently in English.

What we offer

- A challenging and dissimilar job with lots of growth opportunities.
- An inspiring work environment with nice colleagues with a strong focus on atmosphere and team spirit.
- A personal career plan and transparent training program that is discussed on a regular basis with our talent manager and backed through a network of helpful colleagues who will help you to grow technically and professionally.
- Good work-life balance with homework possibilities.
- A full-option payroll package, including lots of fringe benefits, like insurances, electronic devices, net allowances, extra holidays, etc.
- An ecological company-car fleet (Mercedes) in smart combination with other sustainable facilities.
