

## Front-end developer

### What you will be doing to make an impact

As a Front-end developer you will be responsible for **performant web and mobile applications**. You will be designing, developing and **testing** apps through **functional and technical analysis**. You will need to document the applications to improve quality and knowledge transfer. And of course, **fixing bugs** will be part of your daily dose of front-end development.

### Skills you can WOW us with

You are a real **team player** with a passion for front-end development and UX who is at the same time extremely customer focused. Your best soft skill needs to be **communicating clearly** and listening attentively. You tackle deadlines like a rugby player, aim for gold in the quality of your work and although you are a human, and not a robot, you can guarantee that you **rarely make mistakes**. You are driven by knowledge and improve yourself by staying on top of new technologies. Routine is boring to you, so a **diversified job** where you can use your technical, creative and analytical skills and **work from anywhere** in the small country of Belgium, sounds like a dream to you.

We are looking for someone who worked hard for the following hard skills:

- Bachelor or Master degree in IT, ICT, or Multimedia.
- Just graduated or less than 3 years of work experience
- Good knowledge of JavaScript, HTML5, CSS3 and OO programming
- Knowledge of mobile development and frameworks such as Angular JS, Meteor, Bootstrap, Ionic and Famous are a plus
- Practical experience with JavaScript (school or other projects) and you preferably worked with JavaScript during your internship or thesis
- You are bilingual (Dutch/English) and knowledge of French is an advantage

### How you will become an Exellyst

We are not a recruitment agency. We are not a consultancy agency either.

We are tech talent integrators that will help you unlock your full potential. Once hired, you are part of our unique program that will most definitely match your professional needs.

- You are part of the Exellys team (we pay you, while your career takes off) but you are working on challenging projects for our clients.
- You get a personal career coach, access to technical trainings and are encouraged to obtain certificates so you can innovate yourself and boost your professional portfolio.

- After two years, you'll get the opportunity to work for the client as a permanent employee (they pay you, while your career is accelerated).

Sparked your interest? Want to know more about the job? About Exellys? About our remuneration package? You know what to do... hit that APPLY button and become an Exellyst!
