

Front-end and/or Back-end developer

Wanted

3-it is searching for an enthusiastic Front-End and/or Back-End Developer who loves to code. Do you have what it takes to be a Front-End and/or Back-End Developer in a team that delivers high-quality application solutions to large companies in various sectors? Are you dreaming of combining your development work with a healthy dose of fun? Do you see yourself working in an innovative, fast growing company? Do you want to work for one of our clients? Awesome! We are looking for you!

Your specific tasks will include

The Development team focuses on scalable technologies such as Angular, .NET and Azure.

What you offer

- You have an IT degree and/or at least 1 year of development experience
- You're highly interested in technologies such as Angular, .NET, SQL Server or Azure
- You want to work in Agile teams building modern applications
- You understand mobile and responsive design techniques
- You communicate fluently in **ENG** and NL or FRA
- You can work independently, are eager to learn, and have a can-do mentality

Our client

- an interesting challenge with a company that has been nominated one of Belgium's "Best Employers" for many years in a row
- growth opportunities in accordance with your knowledge and commitment
- a corporate culture characterized by open communication and exceptional care for our employees
- a well-known education program

Location client

Diegem and various customer locations.
