

# [zealous] Junior Software Developer

deliver leading-edge soft

As a Junior Software Developer, you'll use the latest tools and technologies available to **deliver leading-edge software**. You'll be responsible for ensuring that company software components are expertly designed, tested, debugged, verified, and ready for integration into DataMiner's best-of-breed solutions.

## A glimpse of.your [future]

Transparency is a key value here at Skyline. So let's forget about empty job titles or colorful descriptions for a moment and take a look at what you'd actually be doing here.

- [ ] You will perform **software development** and **integration**.
- [ ] You will **support software project management**.
- [ ] You will **assist with the development, documentation and maintenance** of architectures, requirements, algorithms, interfaces and designs for software systems.
- [ ] You will develop and maintain **C++ and/or C# code**.
- [ ] You will **integrate software components** into a fully functional software system.

## What skills.do you require?

No doubt you know your way around code. But let's dig a bit deeper into the various technical skills you'll need to get started as a Junior Software Developer.

- [ ] Good knowledge of **Git, C#** and/or **C++**
- [ ] Basic knowledge of **TCP/IP, multithreading, web services** and **.Net Remoting**
- [ ] Basic familiarity with **software programming languages**
- [ ] A deep understanding of **object-oriented design** and its implementation using distributed application infrastructure setup and configuration
- [ ] Strong affinity with **MS Visual Studio** and **.NET technology**
- [ ] Experience with **Jenkins, WPF, XML, HTML, ASPNET** is a definite plus
- [ ] Basic knowledge of **MS Azure Cloud, Azure storage**, and **serverless architecture** is a plus
- [ ] Knowledge of **relational databases** is an asset

## Your [competencies]

You'll be working in a highly technical environment prone to constant change and evolution. On top of that, you'll have to collaborate with a great many (marvelous) people. All very exciting! But it also calls for a special kind of mind- and skillset.

- [ ] You are a **fast learner** and **logical thinker** who has a great passion for software development.
- [ ] You can **adapt very quickly** and **like to dig beneath the surface** to understand how things work.
- [ ] You have good verbal and written **communication skills in English**.
- [ ] You have a bachelor's, master's, or doctorate **degree in ICT, Software and/or Telecom**.

## What's in.it [for you]

### Well-being & health

Your healthy & happiness are our number one priority. From ergonomic office spaces to prime health insurance plans, we've got you covered.

### Money & benefits

We offer financial peace of mind through competitive compensation and benefits like a company car/bike, meal vouchers, a laptop, a mobile phone plan, etc.

### Flexibility & balance

You get the flexibility to work when & where you want. Or take time off when you need it. Because who knows you better than ... you?

### More than an office

Our Izegem-based office has it all: ergonomic offices, a gym and outdoor running track, a cool game room, a cozy break room, and a huge parking lot.

### Personal growth

Your future is really important to us. That's why we support your personal development with continuous training & growth opportunities.

### Close-knit community

We've got your back. You can always count on your fellow Skyliners for a helping hand, a good talk, and amazingly fun team events.
