[perceptive]
Software System Developer

build links betwe

As a Software System Developer, you will be joining a **squad of talented engineers** in an **agile environment**. The software you'll be developing interacts with thousands of different systems and is deployed by leading broadcast and telecom companies around the world. You'll be **building links between users and products**, with the objective to orchestrate complex technological ecosystems more easily and intuitively than ever before.

A glimpse of.your [future]

Transparency is a key value here at Skyline. So, let's forget about empty job titles or colorful descriptions for a moment and take a look at what you'd actually be doing here.

[ ] You will develop **back-end applications** for high-performance system integrations.

[ ] You will develop **front-end visuals** for specific system integrations.

[ ] You will work together with squad members to **analyze client needs** and **provide first-class solutions**, prioritizing customers' requirements.

[ ] You will **become a specialist** in one or more products or in a particular technology domain, depending on your personal interests and capabilities.

[ ] You will grow as a technological expert and **share your knowledge** by coaching, training and teaching.

[ ] You will **apply agile practices** and benefit from its iterative approach by striving towards Minimum Viable Products (MVP).

What skills.do you require?

No doubt you know your way around code. But let's dig a bit deeper into the various technical skills you'll need to get started as a Software System Developer.

[ ] Good knowledge of **C#** and **.Net Framework**

[ ] Experience with **markup languages** (e.g. XML)

[ ] Knowledge of **communication protocols** in general, such as SNMP, HTTP or serial

[ ] Knowledge of **TCP/IP networking**, **multithreading**, **Web Services** (REST, SOAP), and **JSON** is a definite plus

[ ] Knowledge of **databasing** (e.g. MySQL, Apache Cassandra) and **Microsoft Visio** could be an extra asset

[ ] Basic familiarity with the **telecom and broadcast industry** is a plus (e.g. HFC broadband, IPTV, broadcast, cable, satellite systems, ...)

Your [competencies]

You'll be working in a highly technical environment prone to constant change and evolution. On top of that, you'll have to collaborate with a great many (marvelous) people. All very exciting! But it also calls for a special kind of mind- and skillset.

[ ] You are a **fast learner with a great passion** for software product integration.

[ ] You are **eager to understand** how complex devices and systems operate in telecom and broadcast industries, among others.

[ ] You have an **eye for detail** with the ability to capture all corner cases and to deliver high-quality results.

[ ] You can **adapt very quickly** and **enjoy digging beneath the surface** to understand how things work.

[ ] You have good verbal and written **communication skills in English**.

[ ] You have a bachelor's, master's or doctorate **degree in ICT, Software and/or Telecom**.

What's in.it [for you]

💚 Well-being & health

Your healthy & happiness are our number one priority. From ergonomic office spaces to prime health insurance plans, we've got you covered.

🌲 More than an office

Our Izegem-based office has it all: ergonomic offices, a gym and outdoor running track, a cool game room, a cozy break room, and a huge parking lot.

💲 Money & benefits

We offer financial peace of mind through competitive compensation and benefits like a company car/bike, meal vouchers, a laptop, a mobile phone plan, etc.

🎓 Personal growth

Your future is really important to us. That's why we support your personal development with continuous training & growth opportunities.

🌿 Flexibility & balance

You get the flexibility to work when & where you want. Or take time off when you need it. Because who knows you better than ... you?

🙂 Close-knit community

We've got your back. You can always count on your fellow Skyliners for a helping hand, a good talk, and amazingly fun team events.
