nanoGrid for nature

<u>Software Developer</u>

nanoGrid is a young company specialized in the development of the **newest technologies** for monitoring and control of systems related to energy consumption and **sustainability**.

The **nanoGrid technology** and our services allow our customers to monitor and control their energy consumption. This enables them to reduce cost and their carbon footprint.

The role

The **Software Developer** contributes to the front-end development of the nanoGrid web application and to the end-to-end development of nanoGrid mobile applications (Apple iPad).

Your challenges

- End to End development: Develop, test, implement and maintain the nanoGrid mobile applications;
- Front end development for nanoGrid web application;
- Manage planning & progress: Manage your individual sprint planning and reporting progress;
- 3rd line support for application issues: Perform application support, debug and resolve technical issues;
- Technical design: Help with analysis of functional requirements and convert them into technical implementation specifications.

Your talent

- You are experienced in Vue, SQL, HTML, CSS, JavaScript, Docker, JIRA;
- Experience with PHP and/ or experience with time series databases is not a must but a-nice-to-have;
- You are proficient in Dutch and English;
- You dare to ask questions and you want to share your knowledge with us;
- You are driven and dynamic. You like being involved in a project from A till Z: analyzing new features, optimizing the code, implementing bug fixes, identifying risks, integrating feedback from engineers and technicians, etc.;
- You can work independently but you enjoy teamwork as well. You communicate openly and clearly to fellow developers and team lead;
- You feel closely involved with energy / environment topics.

Our offer

A **hybrid** way of working (3 days at the office and 2 days working from home) after onboarding period. A **full-time fixed contract** in a growing company within a dynamic,

young team with a great deal of innovative spirit. We offer a competitive salary package, including **extended extralegal benefits.**

How to apply

Send your CV and motivation letter to petya.nikolova@nanogrid.com

If we seem like a good match, we quickly jump into action. Starting with an introduction (face-to-face or virtually).
